

Breaking Barriers: The Engine That Delivers **More** for Less.

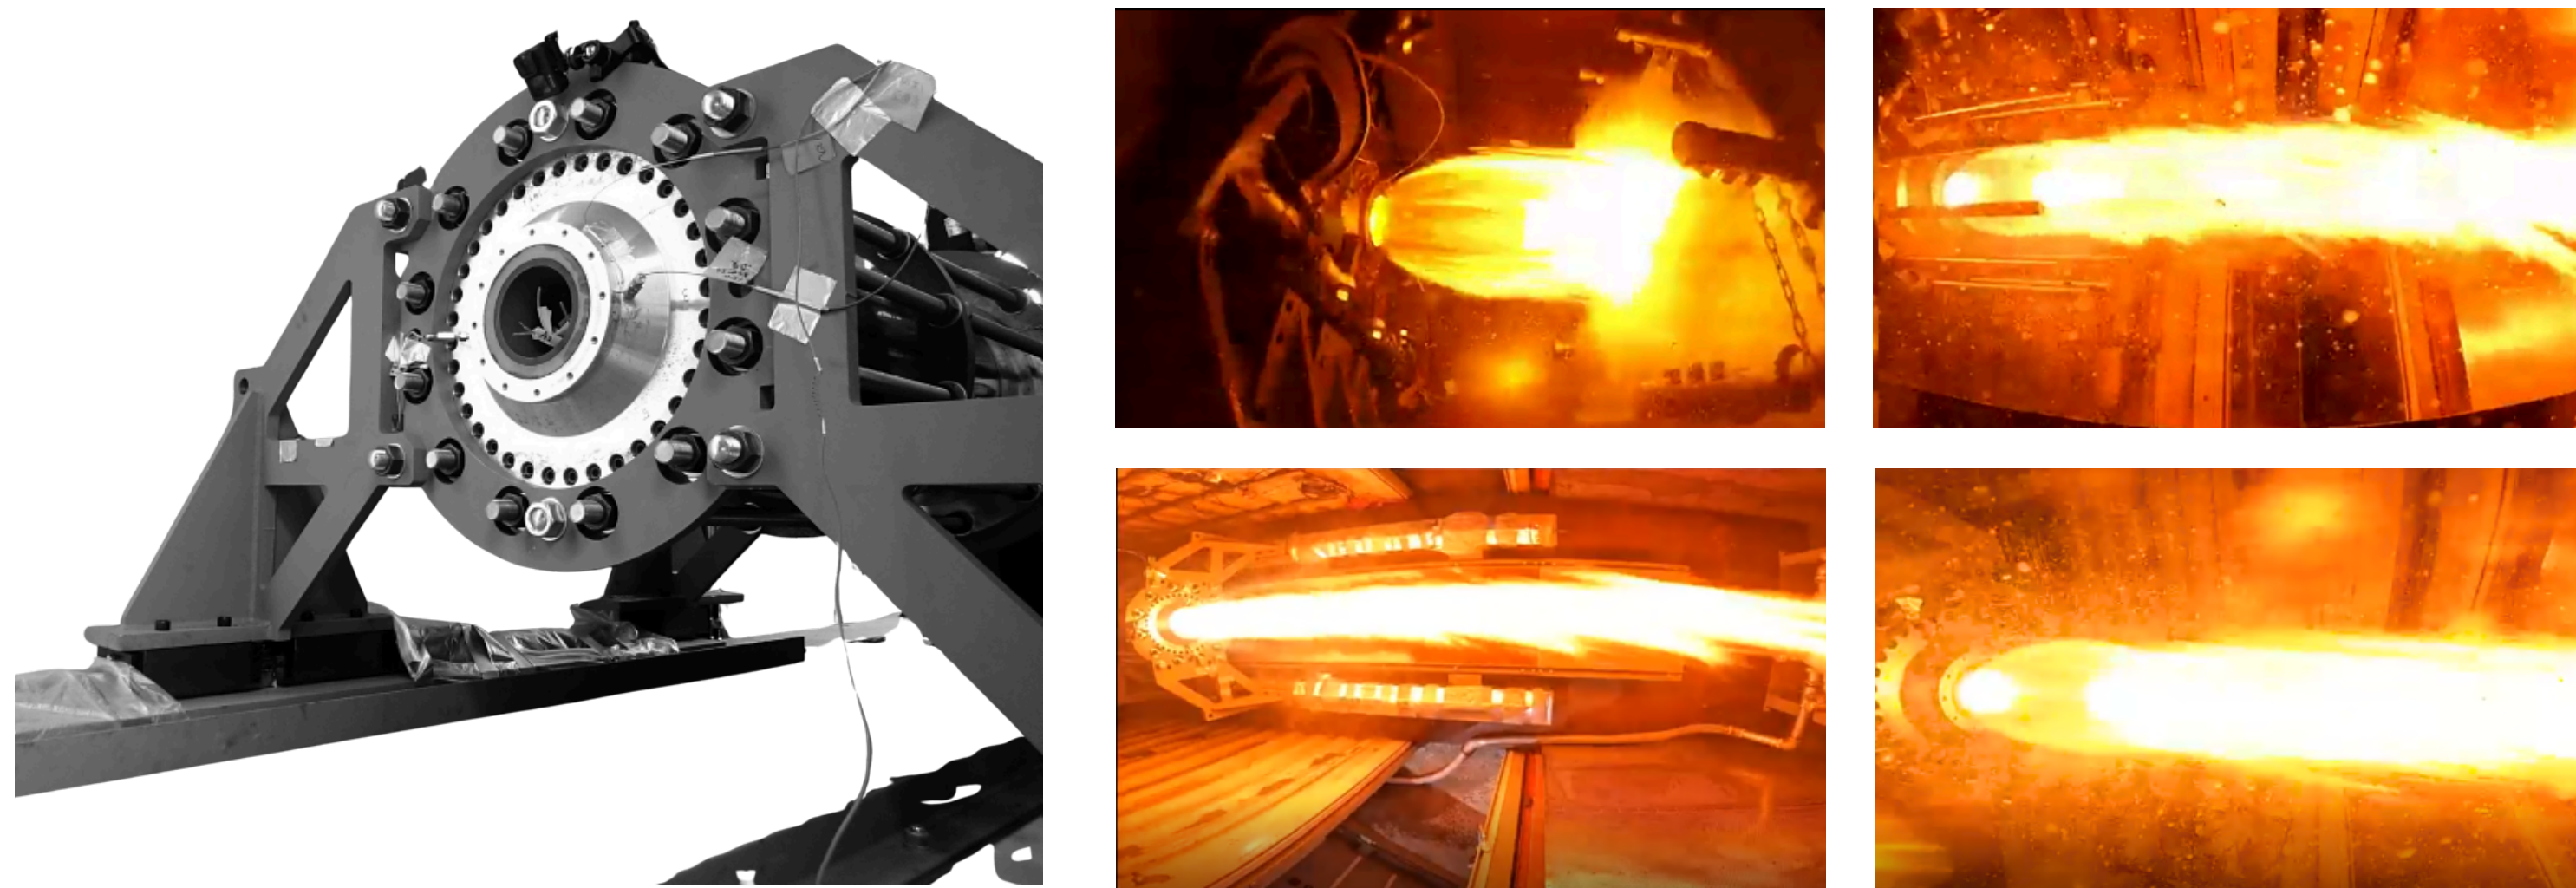

Our mission

Make space accessible through reliable and affordable propulsion technology.

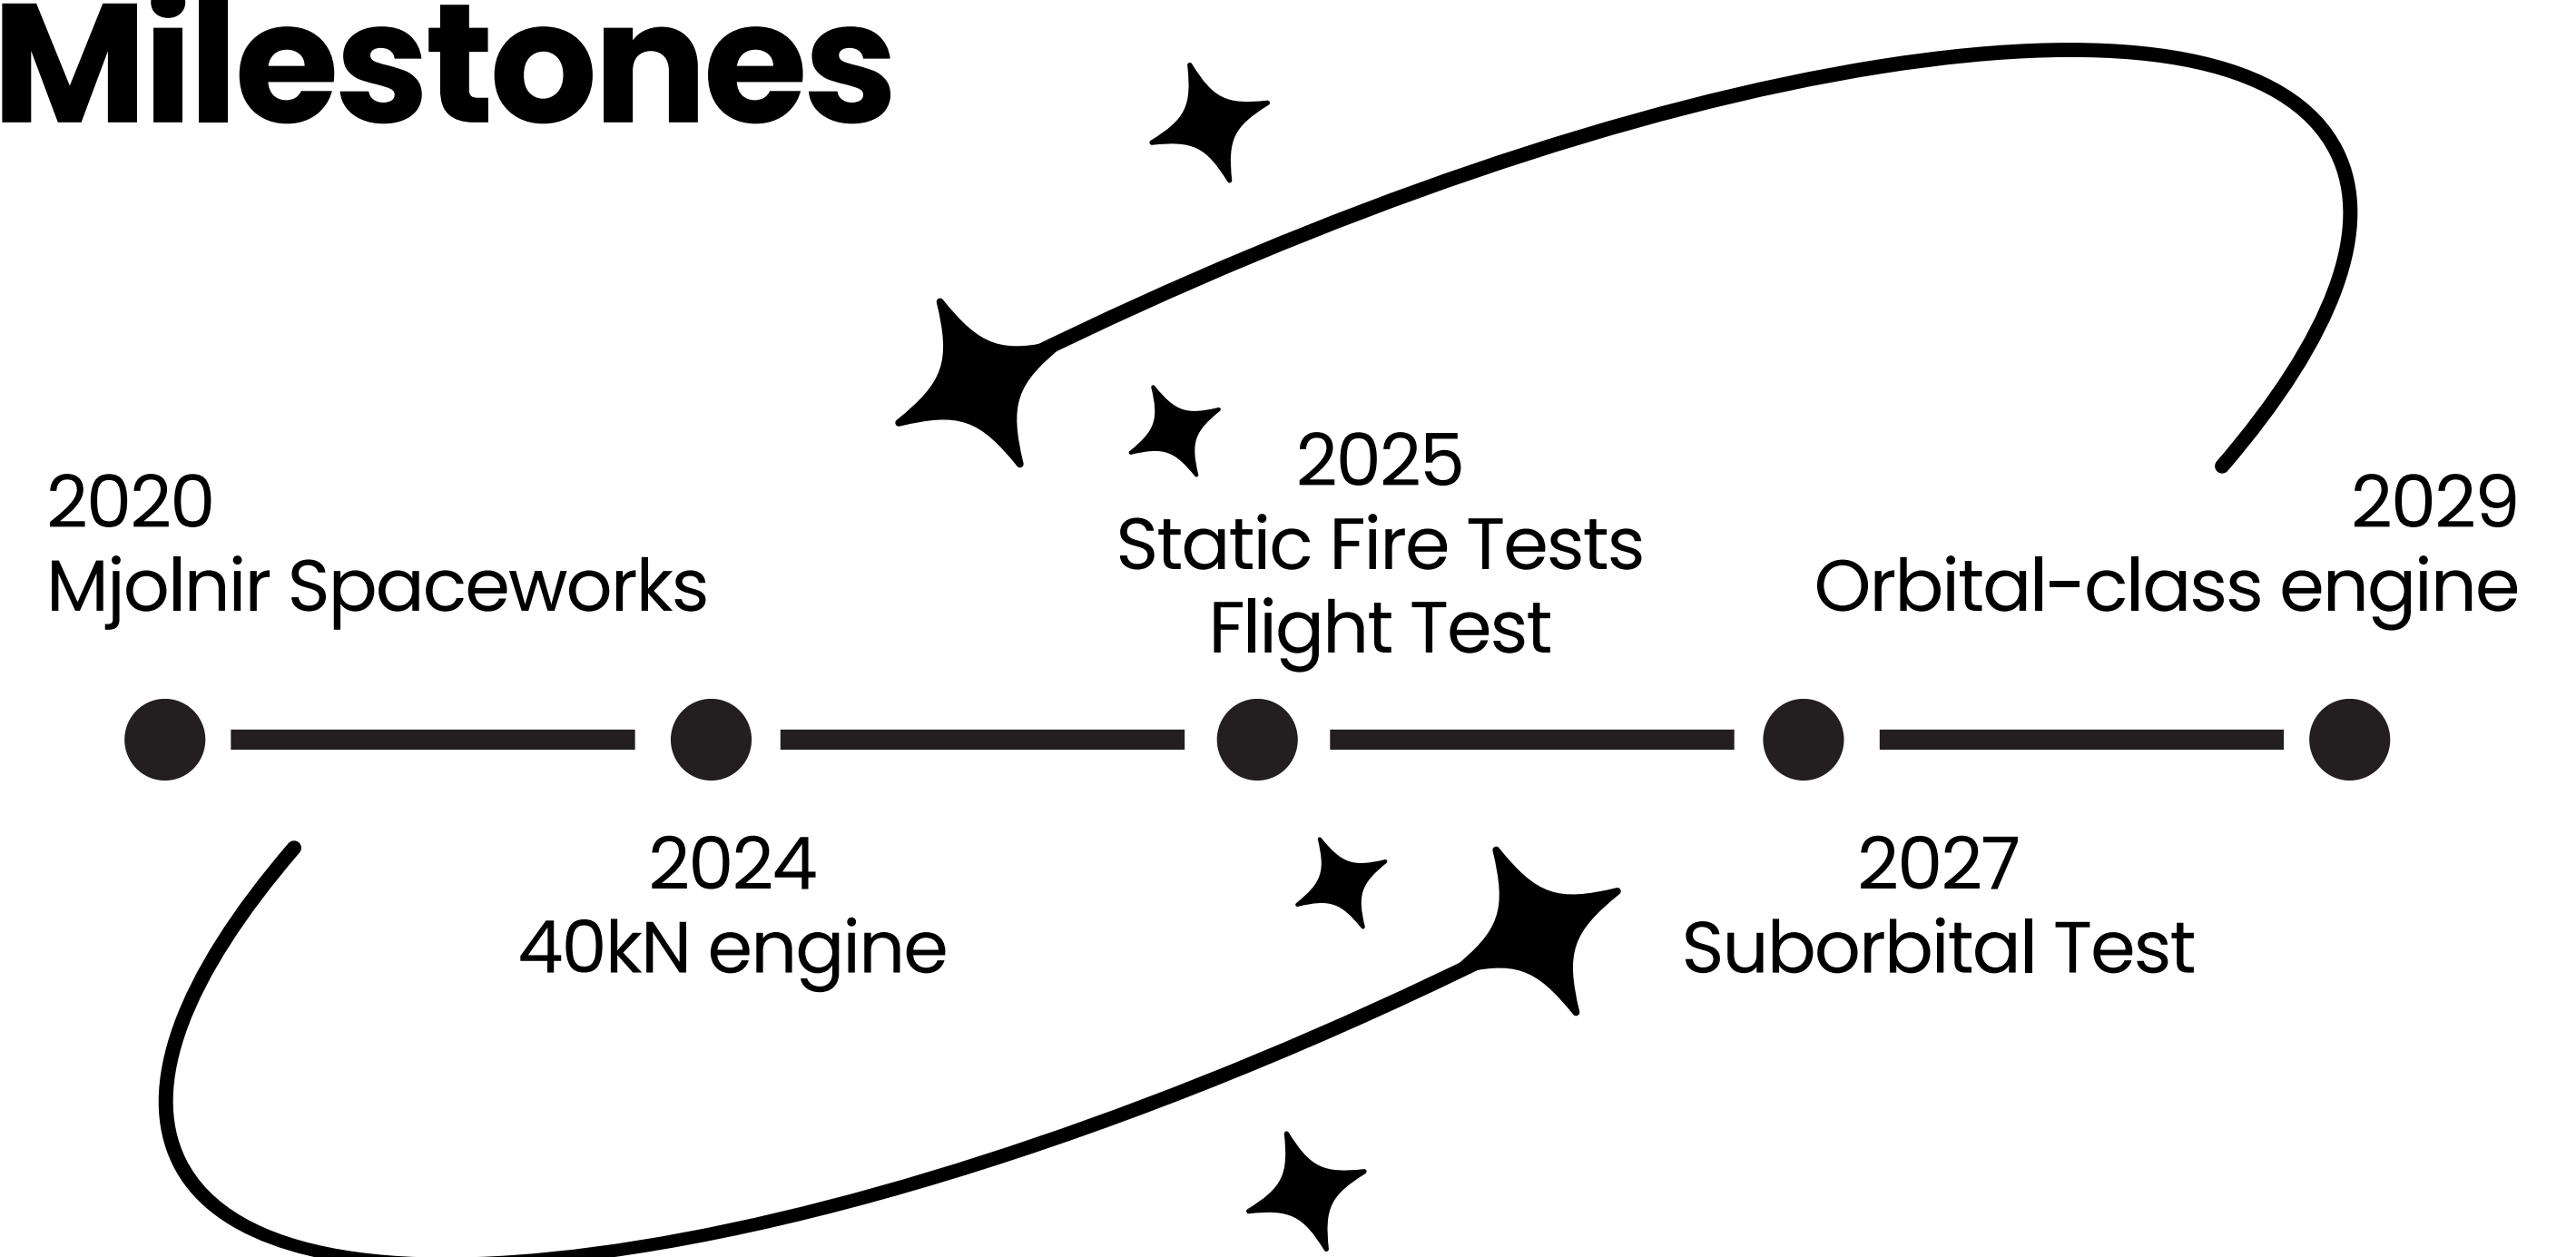

From tanks to engines, our rocket components can be picked out of a catalog, with mass production making them more accessible and affordable than ever.

Heritage

Multiple successful fire tests

Milestones

Hybrid Rocket Engines

- Main Engines & Boosters – scalable, strap-on or clustered
- Customizable – tuned to your rocket's needs
- 70% cost reduction vs. traditional engines
- Short lead time – from ~3 months

Weldless Tanks

- Safe & reliable – weldless, lightweight design
- Custom sizes: 5–250 L, ϕ 150–540 mm, 10~30 MPa
- Short delivery time – within 3 months
- Special orders possible – internal devices, clean specs, etc.
